THE WORDPRESS CREW

Who We Are

We are an India based WordPress development company, founded in 2012.

“We have gained much reputation through our clientbase, from the Envato marketplace as well as through the WordPress community.”

We are experts in WordPress development and our team delivers simple to complex projects to our global clients on a regular basis.

Our Mission

Strategic transformation of business ideas into reality using our exceptional WordPress skills.

Our Vision

To be recognized as a leading WordPress development company worldwide.

Our Values

We are a customer centric development agency at the core. **Our clients and customers means everything to us.**

Our development team indulges in serious discussion with clients right from the planning phase till the project goes live. With this, we are able to deliver exactly what our clients expect from us.

Upgrading the skill set is one of the main core values of our company. Our team members always go some extra miles in upgrading their skill set & we are proud of it.

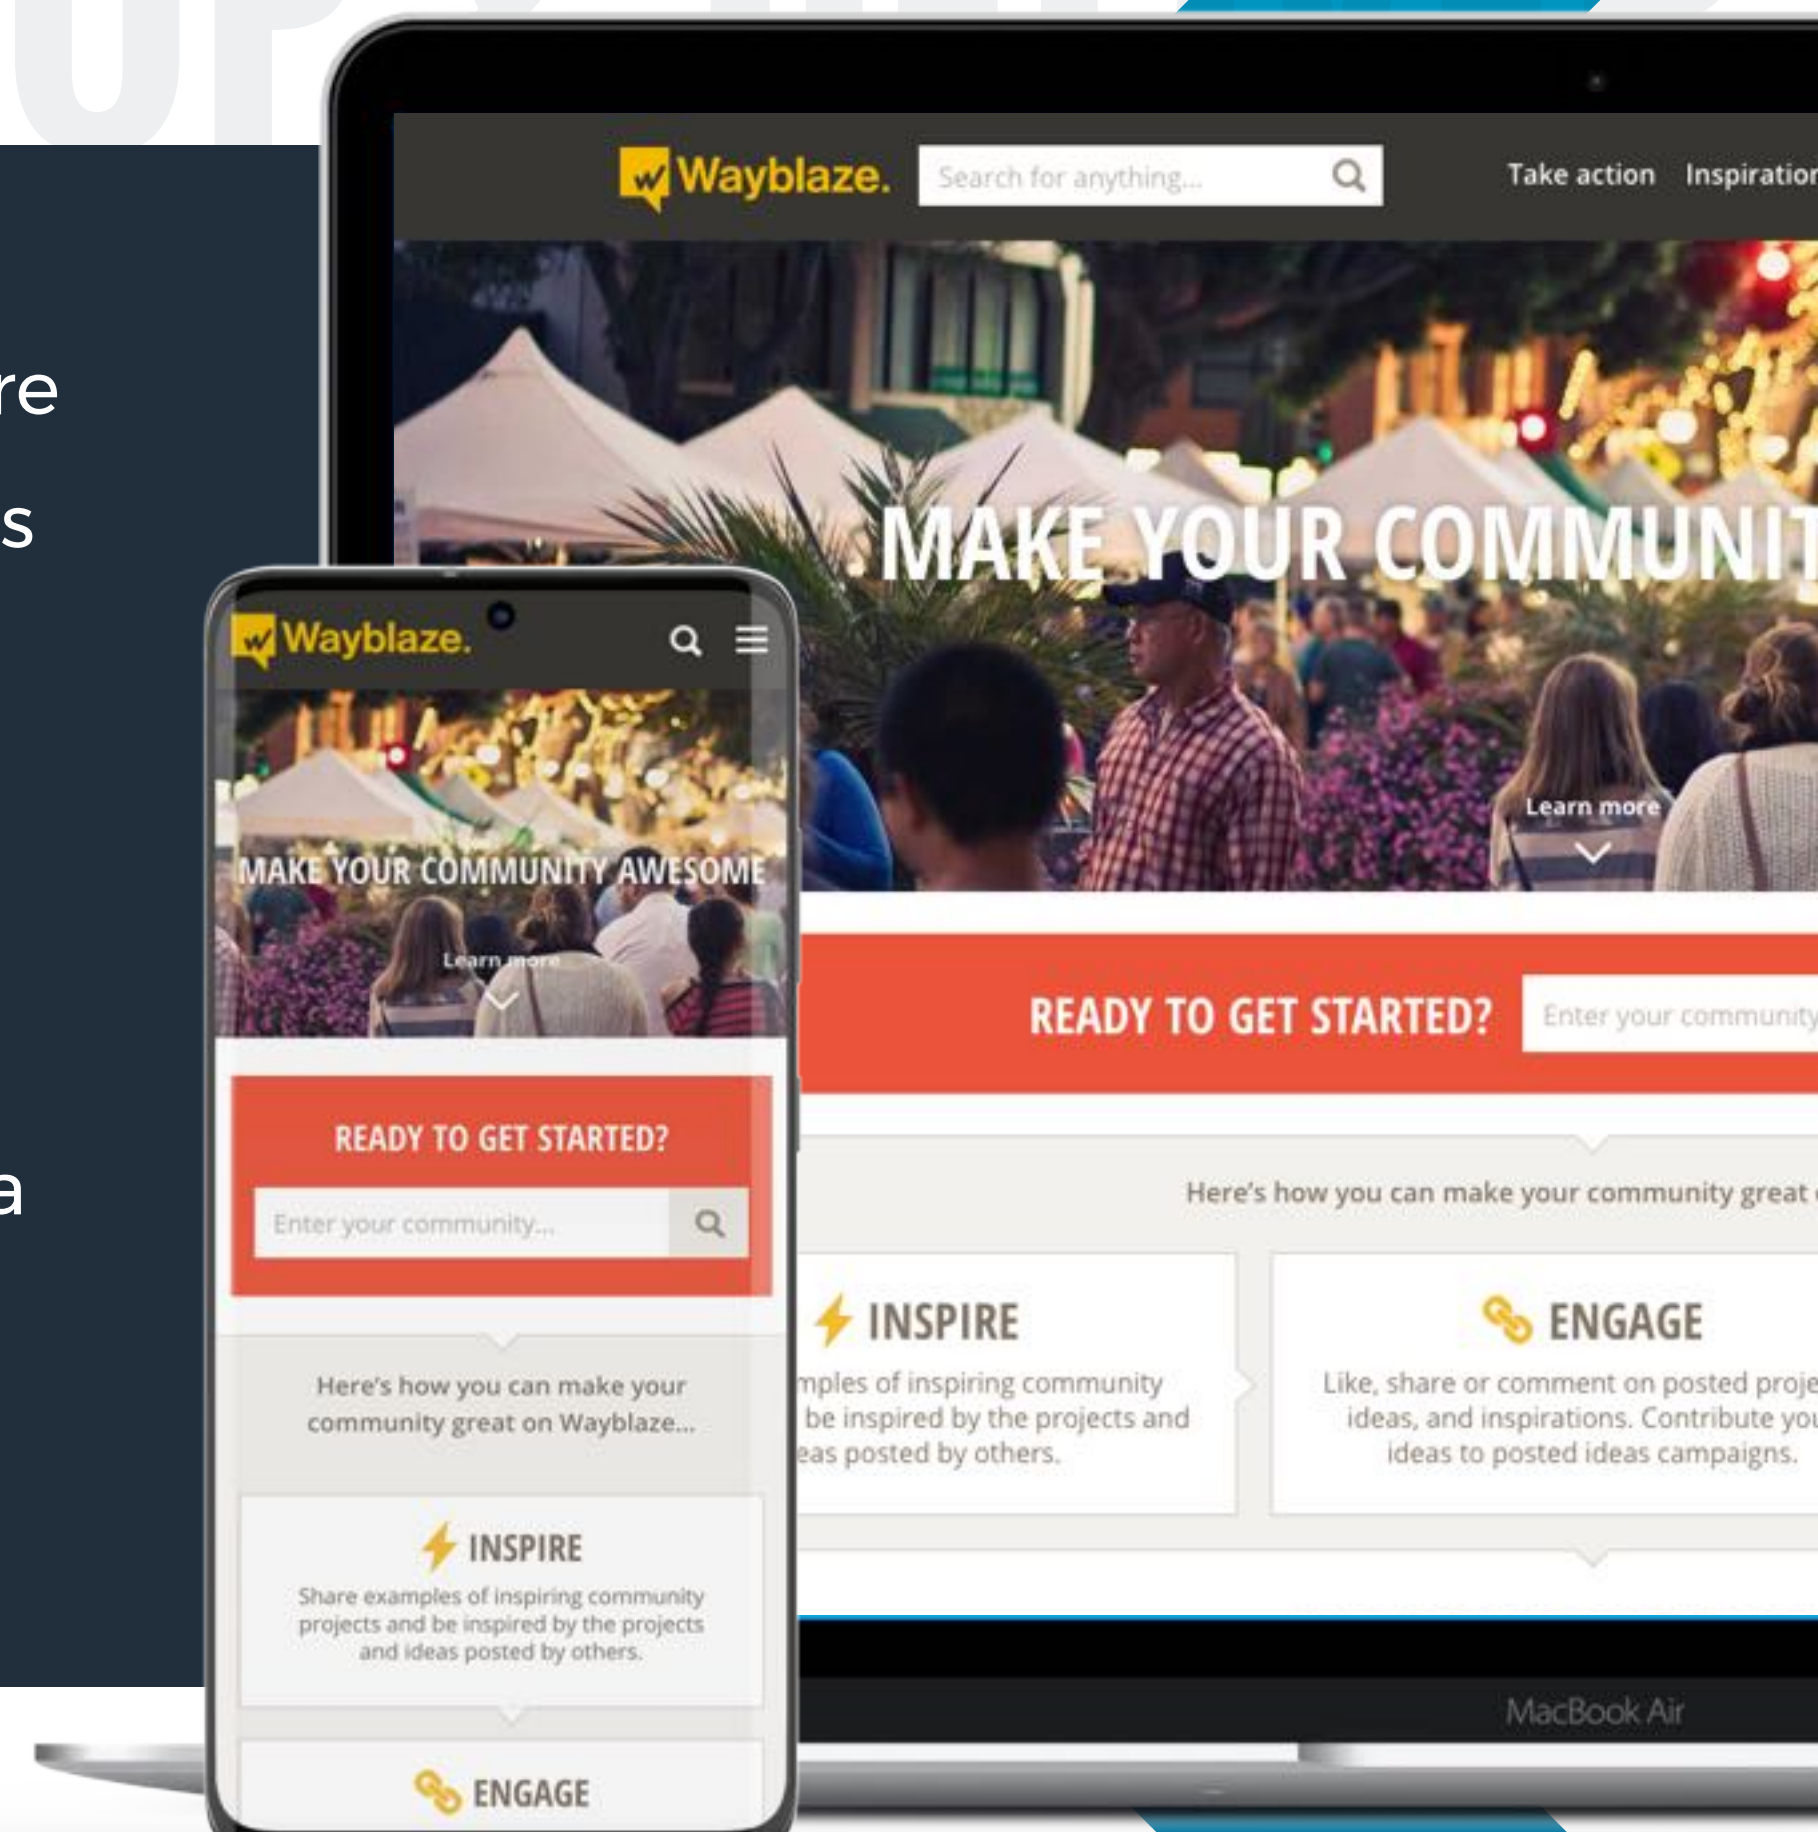

Our Services

9⁺
YEARS
EXPERIENCE

DESIGN, DEVELOP & DELIVER

With years of experience in web development, we are able to design, develop & deliver WordPress websites that are business centric, eye caching, fast & secure.

Our development team follows the best coding practices and standards during the development process. If you want a stunning business website or a membership website or a customer oriented e-commerce store, you can trust our team.

FlipperCode also offers a range of premium WordPress plugins, that are actively working & installed on thousands of WP websites.

If you need any custom & unique WordPress plugin for your business website, you can trust our product development team. We also offer plugin customisation services.

We're also an **Elite Author** on www.codecanyon.net As our company is known for making plugins that are in-demand, we also earned the **Trendsetter** badge on codecanyon.

Copy of our custom developed Plugin for Wordpress on codecanyon

Thanks to all of our clients and customers

for their ongoing continuous support and suggestions.

★★★★★ for **Customer Support** by [adrusztix](#)

Support at a very high level. Quick response and problem solving. The plugin itself also works very well and does the job. I recommend the plugin and its author

★★★★★ for **Customizability** by [barbayrockandroll](#)

The plugin allows you to do a lot of things. Settings are easy and tools like the one that shows your posts on the map are really cool. Also, the custom service is good. I've send an e-mail with an issue and the answered quickly and fixing the problem.

★★★★★ for **Feature Availability** by [itsmir](#)

This is the best mapping plugin around. All the features you could want and excellent value for money.

The support pre & post sale has been great, with fast responses to resolve issues. Would highly recommend.

★★★★★ for **Code Quality** by [RobertN1979](#)

Great plugin. It does what it says that it does. Creating maps and markers is a breeze - and it is even easier to create routes. The only suggestion that I would make for future - is please make it even easier to include hyperlinks in map marker descriptions. But with this - I am nitpicking. Customer support is also absolutely fantastic.
